

Lowering Costs Through Unique Solutions

AMERIGLOBE

Load 'n' Lock Top®

The Load 'n' Lock Top can reduce the height of most bags by 6" to 12", saving you money. This innovation creates more volume above the bag to allow for the cone that naturally forms during bag filling. In addition, the "lock" feature secures the top of the bag. This allows you to reduce overall bag height, secure the product against leaning, and tightens the overall package. Instead of paying for a portion of the bag that remains unfilled, paying for truck/container bracing, or paying for unused container weight, we give a bag that best maximizes the value of your packaging dollar.

- Reduced Package Height
- Reduced Freight Costs
- Reduced Freight Claims
- Improved Stability
- Reduced Need for Bracing
- Improved Arrival Condition

Most companies claim to offer better bag prices. AmeriGlobe's systematic approach lets us find ways to save you more than just packaging dollars. The Load 'n' Lock Top offers multiple cost reducing options. Call AmeriGlobe today so we can work to find the best options for you.
