

Lowering Costs Through Unique Solutions

AMERIGLOBE

Refurbishing Rack Directions

Place pallet in rack, up to a 42" x 48" pallet. Place cover bag on pallet and lay flat. Make sure the edges of the bag are accessible.

Place loops over two poles and lay the bag flat on the pallet. Place the lift loops of the next bag over the opposite two poles. Alternate sides with each bag. Stack bags to the top of the rack, minimum of 50 bags.

Compress the bags using a forklift, then remove the poles. Pull the cover bag up around the bags and tape it closed. Strap the bags to the pallet using three straps.
