

Lowering Costs Through Unique Solutions

AMERIGLOBE

EZ Loop

Pallets are expensive, heavy, and require significant space to store and ship. With the EZ Loop it is easy to eliminate pallet costs.

Every pallet used reduces the amount of product you can ship by 40+ lbs. Given the cost of fuel today, wasting 800-1000lbs of shipping weight is a freight loss no one should suffer through.

The EZ Loop design is a new addition to AmeriGlobe's E-Pack line of environmentally friendly packages. The two largest obstacles to pallet elimination have been ease of use and stackability. The patent pending design of the loops allows eight-way entry and strengthens the lift in the event that a loop is missed by the forklift. With the right sized forklift, operators can move two EZ Loops at a time.

To keep the bags stable for stacking, the EZ Loop bags incorporate the Stacker design. This uses the force of the product to maintain side wall tension after the bag is moved.

- Reduce Shipping Costs
- Reduce Fuel Requirements
- Eliminate Pallet Costs
- Reduce Warehouse Costs
- Reduce Handling Costs
- Reduce Impact on Environment
- 100% Recyclable
- Estimated \$5/Ton Packaging Cost Savings

Most companies claim to offer better bag prices. AmeriGlobe's systematic approach lets us find ways to save you money. Whether it is saving fuel, pallets, shipping or labor, call AmeriGlobe today so we can work to find the best options for you.
