

Lowering Costs Through Unique Solutions

AMERIGLOBE

'Perma' Liner®

Loose liners increase your costs by sagging down into the bag during filling and reducing the usable space in the bag. AmeriGlobe's 'Perma' Liner anchors the liner near the top of the bag to keep the liner from restricting the product in the bag. This keeps you from wasting money.

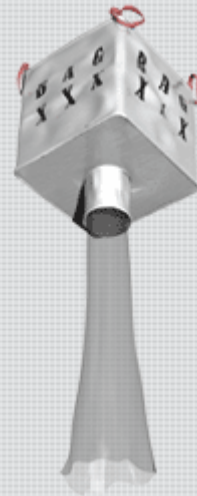

Both tabbed in liners and loose liners can cause discharging and contamination issues. Because we anchor the liner in at the top and the bottom of the bag with circumferential glue lines, this is not an issue. We save you money from contamination issues and the labor from having to pull liner material out of the discharging equipment.

Better yet, the 'Perma' Liner works with standard "tube" shaped liners and can eliminate the cost of pre-formed liners.

'Perma' Liner vs. Loose Liner

Friction caused by product discharge will cause **liner extension with loose liners** as you see below.

- Reduced chance of contamination
- Reduced labor cost to fill
- Reduced labor cost to discharge
- Lowest Liner Cost

Most companies claim to offer better bag prices. AmeriGlobe's systematic approach lets us find ways to save you money. The 'Perma' Liner offers multiple cost reducing options. Call AmeriGlobe today so we can work to find the best options for you.
